Waterlogging and Salinity Tolerance

Invited papers in honour of Hank Greenway

Guest editors:
T.D. Colmer & R. Munns

Foreword
T.D. Colmer and R. Munns **vii–ix**

Reviews

Review of prospects for germplasm improvement for waterlogging tolerance in wheat, barley and oats
T.L. Setter and I. Waters **1–34**

The interaction between waterlogging and salinity in higher plants: causes, consequences and implications
E.G. Barrett-Lennard **35–54**

Waterlogging

Growth responses to waterlogging and drainage of woody *Hakea* (Proteaceae) seedlings, originating from contrasting habitats in south-western Australia
P. Poot and H. Lambers **57–70**

Effects of water vapour pressure deficit and stomatal conductance on photosynthesis, internal pressurization and convective flow in three emergent wetland plants
B.K. Sorrell and H. Brix **71–79**

Measurement of porosity in very small samples of plant tissue
E.J.W. Visser and G.M. Bögemann **81–90**

Oxygen distribution and movement, respiration and nutrient loading in banana roots (*Musa* spp. L.) subjected to aerated and oxygen-depleted environments
E.A. Aguilar, D.W. Turner, D.J. Gibbs, W. Armstrong and K. Sivasithamparam **91–102**

Ionic and pH signalling from roots to shoots of flooded tomato plants in relation to stomatal closure
M.B. Jackson, L.R. Saker, C.M. Crisp, M.A. Else and F. Janowiak **103–113**

Submergence-induced petiole elongation in *Rumex palustris* is controlled by developmental stage and storage compounds
H.W. Groeneveld and L.A.C.J. Voesenek **115–123**

Starch degradation and sucrose metabolism during anaerobic growth of pondweed (*Potamogeton distinctus* A. Benn.) turions
T. Harada and K. Ishizawa **125–135**

Gibberellins are not required for rice germination under anoxia
E. Loreti, J. Yamaguchi, A. Alpi and P. Perata **137–143**

The role of nitrate reduction in the anoxic metabolism of roots I. Characterization of root morphology and normoxic metabolism of wild type tobacco and a transformant lacking root nitrate reductase
M. Stoimenova, R. Hänsch, R. Mendel, H. Gimmler and W.M. Kaiser **145–153**

The role of nitrate reduction in the anoxic metabolism of roots II. Anoxic metabolism of tobacco roots with or without nitrate reductase activity
M. Stoimenova, I.G.L. Libourel, R.G. Ratcliffe and W.M. Kaiser **155–167**

Salinity

Halophyte and glycophyte salt tolerance at germination and the establishment of halophyte shrubs in saline environments
C.V. Malcolm, V.A. Lindley, J.W. O'Leary, H.V. Runciman and E.G. Barrett-Lennard **171–185**

Plant growth and ion relations in lucerne (*Medicago sativa* L.) in response to the combined effects of NaCl and P
M.E. Rogers, C.M. Grieve and M.C. Shannon **187–194**

A rapid method for generating sufficient amounts of uniform genotype-specific material from the woody perennial grapevine for ion transport studies
D.P. Schachtman and M.R. Thomas **195–199**

Screening methods for salinity tolerance: a case study with tetraploid wheat
R. Munns, R.A. James **201–218**

Interaction of NaCl and Cd stress on compartmentation pattern of cations, antioxidant enzymes and proteins in leaves of two wheat genotypes differing in salt tolerance
K.H. Mühling and A. Läuchli **219–231**

Differential effects of salinity on leaf elongation kinetics of three grass species
G.R. Cramer **233–244**

Characterization of a family of vacuolar Na^+/H^+ antiporters in *Arabidopsis thaliana*
G.S. Aharon, M.P. Apse, S. Duan, X. Hua and E. Blumwald **245–256**

Vegetation in saline-waterlogging environments

The challenge of restoring vegetation on tidal, hypersaline substrates
J.B. Zedler, H. Morzaria-Luna and K. Ward **259–273**

Floodwater infiltration through root channels on a sodic clay floodplain and the influence on a local tree species *Eucalyptus largiflorens*
H. Bramley, J. Hutson and S.D. Tyerman **275–286**

Volume 253 No. 2

Mycorrhizal colonisation improves fruit yield and water use efficiency in watermelon (*Citrullus lanatus* Thunb.) grown under well-watered and water-stressed conditions
C. Kaya, D. Higgs, H. Kirnak and I. Tas **287–292**

Glomalin, an arbuscular-mycorrhizal fungal soil protein, responds to land-use change
M.C. Rillig, P.W. Ramsey, S. Morris and E.A. Paul **293–299**

Effect of irrigation frequency on root water uptake in sugar beet
S. Camposeo and P. Rubino **301–309**

Plant uptake of ^{14}C-EDTA, ^{14}C-Citrate, and ^{14}C-Histidine from chelator-buffered and conventional hydroponic solutions
P.F. Bell, M.J. McLaughlin, G. Cozens, D.P. Stevens, G. Owens and H. South **311–319**

Soil type affects nitrogen conservation in foliage of small *Pinus sylvestris* L. trees
M. Pensa and A. Sellin **321–329**

Variation in the export of ^{13}C and ^{15}N from soybean leaf: the effects of nitrogen application and sink removal
H. Nobuyasu, S. Liu, J.J. Adu-Gyamfi, P.K. Mohapatra and K. Fujita **331–339**

Potassium nutrition of Cabernet Sauvignon grapevines (*Vitis vinifera* L.) as affected by shoot trimming
S. Poni, M. Quartieri and M. Tagliavini **341–351**

Nitrogen fixation in perennial forage legumes in the field
G. Carlsson and K. Huss-Danell **353–372**

The effect of *Pseudomonas fluorescens* strains varying in pyoverdine production on the soil redox status
A. Pidello **373–379**

Bacterial endophytes in processing carrots (*Daucus carota* L. var. sativus): their localization, population density, biodiversity and their effects on plant growth
M.A. Surette, A.V. Sturz, R.R. Lada and J. Nowak **381–390**

Monitoring of changes in physical and microbiological properties of a Chernozem amended with different organic substrates
R. Sonnleitner, E. Lorbeer and F. Schinner **391–402**

Influence of a biodegradable ([S,S]-EDDS) and nondegradable (EDTA) chelate and hydrogel modified soil water sorption capacity on Pb phytoextraction and leaching
B. Kos and D. Leštan **403–411**

The interaction of phosphorus and potassium with seed alkaloid concentrations, yield and mineral content in narrow-leafed lupin (*Lupinus angustifolius* L.)
P. Gremigni, J. Hamblin, D. Harris and W.A. Cowling **413–427**

Effect of *Fusarium oxysporum* f. sp. *glycines* and *Sclerotium rolfsii* on the pathogenicity of *Meloidogyne incognita* race 2 to soybean
O.A. Akinsanmi and O.K. Adekunle **429–435**

Uptake and transport of selenite and selenate by soybean seedlings of two genotypes
Y. Zhang, G. Pan, J. Chen and Q. Hu **437–443**

The role of ground vegetation in the uptake of mercury and methylmercury in a forest ecosystem
D. Schwesig and O. Krebs **445–455**

Effect of crop and soil management practices on soil compatibility in maize and groundnut plots in a Paleustult in Southeastern Nigeria
M.A.N. Anikwe, M.E. Obi and N.N. Agbim **457–465**

High fertigation frequency: the effects on uptake of nutrients, water and plant growth
A. Silber, G. Xu, I. Levkovitch, S. Soriano, A. Bilu and R. Wallach **467–477**

Soil-productivity relationships and organic matter turnover in dry tropical forests of the Florida Keys
M.S. Ross, C.L. Coultas and Y.P. Hsieh **479–492**

Integration of soil solarization with chemical, biological and cultural control for the management of soilborne diseases of vegetables
C. Stevens, V.A. Khan, R. Rodriguez-Kabana, L.D. Ploper, P.A. Backman, D.J. Collins, J.E. Brown, M.A. Wilson and E.C.K. Igwegbe **493–506**

Differential tolerance of high manganese among rapeseed genotypes
J.S. Moroni, B.J. Scott and N. Wratten **507–519**

Volume contents **521–524**

Author index **525**
